

Choosing & Managing the Registry Checklist

- Choose the store (or stores) at which you want to register.
- Have your registry consultant input your selections into the computer system and send you a list for verification.
- Check the list for accuracy of:
 - Brand names
 - Pattern names
 - Colors
 - Quantity
- Call the store with any changes (or better, make them before you leave).
- Let immediate family and wedding-party members know where you're registered, so they can tell shower guests and wedding guests who ask. If you prefer cash or decide not to register, let people know that, too.
- Ask the store for a registry list to be sure gifts are being deleted as they are purchased. Do this periodically (once a month, perhaps), starting as soon as gifts begin to arrive.
- Open gifts as you receive them and record who gives you what in the gift log on page 193. Keep packaging and cards with gifts to make it easier should you need to return anything.
